

SCALP NEUTRALISANT ACIDE

NEUTRALIZER ACIDIC LIQUID

PACKAGING :

- Shell 200l Blue dark HDPE certified UN / Filled to 240 Kg
- 20l cans Dark blue HDPE certified UN / Filled at 25 Kg

A REAS OF APPLICATION

SCALP Neutralizer Acid is a new neutralization product after pickling or degreasing on the enamel preparation lines. It can also be used for the neutralization of traces of alkaline strippers, soda or potash.

SCALP Neutralizer Acid, must be diluted before use.

This product makes it possible to sequester divalent and tetravalent iron.

A PPLICATION

CONCENTRATION : Product should be diluted 5% to 15%.

BATH TEMPERATURE : Ambient temperature.

CONTACT TIME : A few minutes to a few hours, depending on the nature of the media to be treated. In practice a few minutes suffice for a complete and profound neutralization on non-porous substrates, on wood wait 1 to several hours. Rinsing rooms with city water.

BATH CONTROL : The bath should be kept clean and free of basic traces. It is better to renew the bath as soon as a drop in activity is observed

8.STORAGE :

- Min storage temperature: +10 ° C
- Max storage temperature: + 25 ° C

Store in tightly closed containers, protected from the weather and direct sunlight.

If the product is not used within 12 months from the date of manufacture but storage conditions have been met then additional time may be allocated. In this case, contact our sales department.
